Compliance Flow Chart

How it works

- TEST-KiT is a unique product developed to help contractors and inspectors to fulfill their obligations and simply to meet the current building regulations.
- TEST-KiT is kept in a secured box on site for contractors and inspectors to use. The Building Compliance Diary (BCD) is also included and usually kept in the office for building managers.
- The Building Compliance Diary consists of all the necessary information for auditing purposes (usually by City Councils and Fire Authority). This includes: Building Info, Essential Safety Measures, Inspection Schedule, Annual Report, and Service Records.
- Refer to the Compliance Flow Chart for more details.
